- Manage third-party contracts and ensure compliance with agreements.
- Communicate system changes, enhancements, and modifications both verbally and through written documentation to Dealership Management, managers, and other stakeholders to ensure clear understanding of issues and solutions.
- Negotiate with foreign and local suppliers regarding the costing and functional specifications of requested system enhancements
- Design test plan documents for quality assurance and perform end-to-end testing to ensure functional requirements are met.
- Directly reporting to the company's ExeCom and Department managers regarding extensive monthly annual project reports.
- Provides help and assistance to end users by identifying and troubleshooting system issues & looking for opportunities for improvements.

Projects implemented:

Virtual@Honda an innovative e-commerce platform that allows customers to inquire, book a test drive, request a quotation, and reserve a vehicle online all through our virtual showroom.

Dealer Portal - backend of Virtual@Honda which supports Dealerships in achieving faster communication with customers. It digitalizes lead distribution from marketing activities and enables monitoring and responding to online transactions via mobile devices, without requiring a VPN connection.

Integration of Website transactional data with SAP thru API

Automated customer account creation in SAP CRM & DBM Sales, eliminating double entry of customer data and ensuring account duplication is prevented.

Improved data accuracy from 40% to 92% by implementing effective data validation rules and enhancing the customer data collection process through targeted system improvements, leading to more reliable analytics and better business decisions.

Invoice registration in SAP to normalize inventory levels and assess the network's natural sales strength.

Logistics Sr. Associate

Honda Cars Philippines, Inc | Jan 2020 - August 2020

- Inventory management and vehicle allocation
